## ABOUT US

Integral Global expands the reach and effectiveness of federal agencies and international organizations in hard-to-reach environments to deliver public health impact to vulnerable communities. Sustainability and relational integrity are central to our approach to every engagement. We collaborate directly with Ministries of Health and local partners in the Middle East, Central Asia, South Asia, and East Africa to ensure that the impact of our work continues long after a project concludes. Our track record, in-country relationships, and knowledge of ground-level operations allow us to rapidly and effectively mobilize resources to achieve our clients' goals.
